TIMI AMBAYE

FULLSTACK SOFTWARE ENGINEER | SYSTEM DESIGN EXPERT
me@timiambaye.com | GitHub | LinkedIn | Portfolio

PROFILE

Resourceful and collaborative Full-Stack Software Engineer with 5 years of experience designing and developing scalable mobile and web applications, and efficient system architectures. Specializes in full-stack development using TypeScript, Python, JavaScript, and modern frameworks like React, React Native, Node.js, Django and Flask. I am passionate about building user-friendly solutions across SaaS, analytics, and healthcare domains. Experienced in CI/CD, cloud infrastructure (AWS, Azure), and DevOps practices that enhance software delivery and team productivity. Known for driving cross-functional collaboration, mentoring junior engineers, and continuously improving systems for resilience and performance.

AREA OF EXPERTISE

- **Programming Languages & Frameworks:** JavaScript • TypeScript • HTML • CSS • React.js • React Native • Expo • Next.js • Python • PHP • Node.js • NestJS • Django • Flask • Laravel
- **DevOps & Cloud:** Docker • Kubernetes • Jenkins • GitHub Actions • AWS (Lambda, DynamoDB, S3) • Azure
- **Testing & Quality Assurance:** Jest • Cypress • JUnit • Functional Testing • Integration Testing • CI/CD Pipelines
- **Tools & Collaboration:** Git • Jira • Confluence • Figma • Agile & Scrum • DevOps Practices

---

WORK HISTORY

TELK (Contract), Luxembourg
* Software Engineer / Full Stack | June 2025 – September 2025*

- Leading the design and development of custom software systems tailored to client-specific needs across various industries
- Working closely with clients and business developers to define architecture, technical requirements, and scalable solutions
- Designing system integrations, APIs, and data models to support high-performance, maintainable software platforms
- Supporting delivery teams through code reviews, mentoring, and architectural guidance

GOALR.WORLD, Nigeria
* Mobile Developer/ Frontend | July 2024 – April 2025*

- Designing and optimizing the Goalr mobile app, Admin platform for Kuda using TypeScript, Expo, React Native and Next.js
- Implementing git action CI/CD pipelines to accelerate deployment cycles and reduce integration errors
- Implemented core health tracking features with google health and fitness metrics
- Collaborating cross-functionally to improve platform reliability, performance, and user engagement

CREDIB, Nigeria
* Software Developer/ Team Lead | July 2022 – January 2024*

- Built and maintained an event vendor marketplace, mobile and web using React native, Expo, Typescript, Nextjs, GraphQL and Node.js
- Deployed mobile applications to both play store and Apple store
- Leading UI/UX improvements and client onboarding
- Partnering with cross-functional teams to deliver end-to-end product features
- Driving test automation and efficient backend development

ALX, Nigeria (Internship), Nigeria
Junior Full Stack Developer | January 2021 – November 2021

- Delivered full lifecycle web solutions using PYTHON, Flask, and Django
- Developed e-commerce features, including secure payment gateway integration
- Participated in backend architecture for client-facing online platforms
- Conducted regular code reviews and site optimizations to enhance performance
- Engaged directly with clients to define requirements and deliver custom solutions

ANDELA (ALC), Nigeria
* Facilitator & Programming Mentor | January 2019 – August 2020

- Program facilitator Android application development, Google Africa Developer Scholarship (GADS)
- Mentor and introduce new junior software developer students
- Review and score student projects
- Facilitated agile ceremonies and team collaboration to ensure milestone achievements

---

EDUCATION

BSc Computer Science
National Open University of Nigeria, Nigeria | October 2015 – November 2022
Associate of Science, Computer Science (In View)

CERTIFICATIONS

- Android Application Developer - Google Udacity (https://www.udacity.com/certificate/4W4CENFH)
- React / React Native Developer - Udacity (https://confirm.udacity.com/NSGAGJFM)
- ALX-T Full-Stack Developer (https://confirm.udacity.com/6DYCCP6V)
- Meta Full-Stack Engineer : (verify on Credly)

ACHIEVEMENTS

- Successfully led modernization of multiple legacy systems, reducing tech debt and boosting efficiency
- Mentored junior developers who progressed into full-time engineering roles within a year
- Reduced deployment time by 40% through automation and CI/CD integration
- Played a lead role in transitioning monolithic apps into a scalable microservice architecture
- Developed hospital software solutions now deployed in multiple clinics across Nigeria
